Notes:

- This font is freely distributable. Any document, printed, electronic, or otherwise, which uses this font must carry the inscription: "Finger diagrams courtesy of Clint Goss, www.NAFTracks.com".

- The NAF6ToDiatonic font can be used on a song scored using the NAF6 font, that you then want to convert to diatonic fingerings. You can simply change the font and the finger diagrams will change to fingerings for a standard diatonic flute.
